SUMMARY

Frontend Developer with nearly 2 years of experience in React and React Native development for web and mobile applications. Proficient in SharePoint to full-stack systems. Comfortable working in fast-paced environments while multitasking projects, meeting deadlines, and collaborating effectively within development teams.

PROFESSIONAL EXPERIENCE

Software Developer, MTO GCC | Tashkent, Uzbekistan   **07 / 2023 - Present**

- Architected and deployed 8+ SharePoint SPFx applications using React and Microsoft Graph API
- Created comprehensive user directory system with advanced filtering and profile management, serving 200+ employees.
- Implemented interactive office seating chart with automatic desk location highlighting, reducing time spent locating colleagues.
- Built dynamic user profile system allowing employees to showcase skills, languages, and professional information, enhancing collaboration across the organization.
- Developed REST API integration skills while working with Microsoft's ecosystem.
- Gained proficiency in React hooks, JavaScript fundamentals, and state management.

INDEPENDENT PROJECTS

Consulting Platform (websmartcons.com)   **02 / 2024 – 10 / 2024**

- Sole Front-End developer implementing responsive Bootstrap 5 design across breakpoints with modular component system and Universal CSS classes.
- Integrated third-party JavaScript libraries (calendar systems, text editors) while learning Django backend concepts (views, models, migrations).
- Collaborated in an agile team using Git/Bitbucket workflow to ensure efficient development cycles, version control and code quality.

Bill Splitting Mobile App (Play Store URL)   **10 / 2024 - Present**

- Building a React Native application in a 3-person team currently in beta testing with Git version control and CI/CD practices, implementing React-Reanimated for fluid animations and i18n for multilingual support.
- Identified and resolved performance bottlenecks using React DevTools, optimizing render cycles with strategic hook implementation.
- Implemented Zustand state management with optimized hooks, reducing component render times by ~50%, alongside lazy loading and code splitting for improved load performance.

EDUCATION

University of London | London, UK   **10/2023 - Present**

Bachelor of Computer Science

TOOL & FRAMEWORKS EXPERTISE

React || React Native ||Websockets || SharePoint || SPFx || Microsoft Graph API || Bootstrap || Django || Git/Bitbucket || CI/CD || React Animated || Zustand || RESTful APIs || JavaScript/TypeScript || JQuery || TailWind || Figma || Vite || Firebase || Expo || Wordpress || Expo || Axios || Power Apps
